SDGs Declaration

Human Rights·Labor

To build a comfortable workplace where diverse human resources can thrive

< Specific Initiatives >

- Promoting diversity to empower individuals regardless of nationality, age, or gender
- Create a healthy and safe work environment through fairness
- Effective management of working hours and monitor overtime hours by introducing an attendance management system
- Collaborate with external organizations to create a comfortable work environment by preventing long working hours

< Relevant Goals >

Products·Services

To provide public safety and security to customers worldwide with our products

< Specific Initiatives >

- Provide long-term security to customers through highly durable products
- Contribute to earthquake countermeasures in other countries by establishing distributors
- Promote the reduction of hazardous chemical substances by using products that comply with the European RoHS directives
- Aim to further improve the quality of our products by reflecting on our customers' feedback

< Relevant Goals >

Environment

To further promote environmental conservation through sustainable product manufacturing

< Specific Initiatives >

- Commit to greenhouse gas reduction by conducting manufacturing processes with low power consumption
- Promote a paperless society by extending awareness throughout the company
- Promote 3Rs through plastic waste segregation and improved packaging materials
- Reduce packaging materials and aim to reduce material costs and transportation energy consumption
- Carry out appropriate measures in accordance with Waste Management Laws

< Relevant Goals >

Social·Local Contribution

To continue to contribute to society and cooperate with local government

< Specific Initiatives >

- Earthquake detectors are integral in preventing and mitigating disasters in society
- Provide support to areas affected by earthquakes
- Engage with factories in disaster areas to contribute to community reconstruction and reflect the Japanese disaster prevention elements in our products
- Nurture future generations by encouraging the participation of college students in manufacturing
- Disclose relevant company information through communication with stakeholders

< Relevant Goals >

• SDGs is an abbreviation for Sustainable Development Goals, which are international goals for the year 2030 adopted by the United Nations.
• It consists of 17 goals and 169 targets in areas such as the economy, society, and environment, and pledges to "leave no one behind on the planet."
